MO SPEECH

Mo Speech · *Founder, designer and developer*

SEP 2023 TO PRESENT

- Designed dashboard navigation after research with parents and a review of the leading AAC apps, which hide navigation among the symbols.
- Launched the MVP in January 2026: 166 sign-ups in three months, plus 2 therapists onboarded.
- Built the full AAC app from April to November 2026: dashboard navigation, sentence building, a live teaching mode across devices, and three languages.
- Case study: mohanveraitch.com/projects/mo-speech

PROFILE

I am a Product Designer who builds what I design. I founded Mo Speech, an AAC app that helps people who can't speak communicate with symbols. I designed and built it from my own experiences. I also bring a broad range of design and editing skills from 20 years in media.

SKILLS

Design: Figma, design systems, user research, information architecture, prototyping, accessibility

Build: Next.js, React, TypeScript, Convex, Python

AI: Claude Code, MCP, agent workflows

Media: Premiere Pro, After Effects, DaVinci Resolve, Photoshop
